Your activities in castle Morosini - Grimani

+ Castle exploring and multimedia exhibition

Morosini – Grimani Castle is today a newly renovated and revitalized castle dating from the 13th century. The multimedia exhibition - certainly the most attractive part of the castle, is based on the perception and interpretation of key historical events in the architectural and social development of the castle, or Svetvinčenat. 5 floors of the palace were put into the function, each intended for a specific activity: a tasting and sales area, a gallery, a multimedia exhibition, a congress center and a wedding hall, and at the very top the Captain's Room. Along the entire palace lies the Exhibition of Old Weapons “Ferlin”. In a completely new way, the palace has regained its functionality, and with the introduction of diverse content, the cultural offer of Svetvinčenat has reached a new level.
